FACT ABOUT VISION

An estimated **253** million people live with vision impairment.

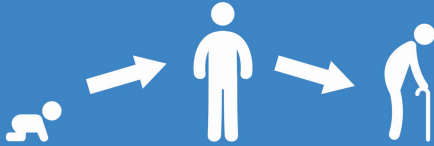

Globally, **CHRONIC EYE DISEASES** are the main causes of vision loss.

Over **80%** of all vision impairment can be prevented or cured.

MYTHS VS FACTS

My **EYESIGHT** and **OVERALL EYE** health will worsen as I age, no matter what I do.

Intake of **PROPER NUTRIENTS**, wearing sunglasses and regular eye exams, can support a **LIFETIME** of healthy eyes.

If I eat **CARROTS** regularly, I'm getting all the **NUTRIENTS** I need to support healthy vision.

Carrots are high in **VITAMIN A** but they lack essential eye **NUTRIENTS (LUTEIN)** which is important for overall eye health.

If I can **SEE**, my eyes must be **HEALTHY**.

When vision is **AFFECTED**, some condition might be irreversible.

If you can't notice a **PROBLEM**, you don't need an eye exam.

Many eye **DISEASES** don't show up any **OBVIOUS SYMPTOMS** at the beginning.

Eye doctor are only for **VISION CORRECTION**.

Certain **EYES DISEASE** need to be ruled out with specific diagnostic tool by doctor to **AVOID MISDIAGNOSIS**.

Serious eye **DISEASES** only faced by people over **AGE 50**.

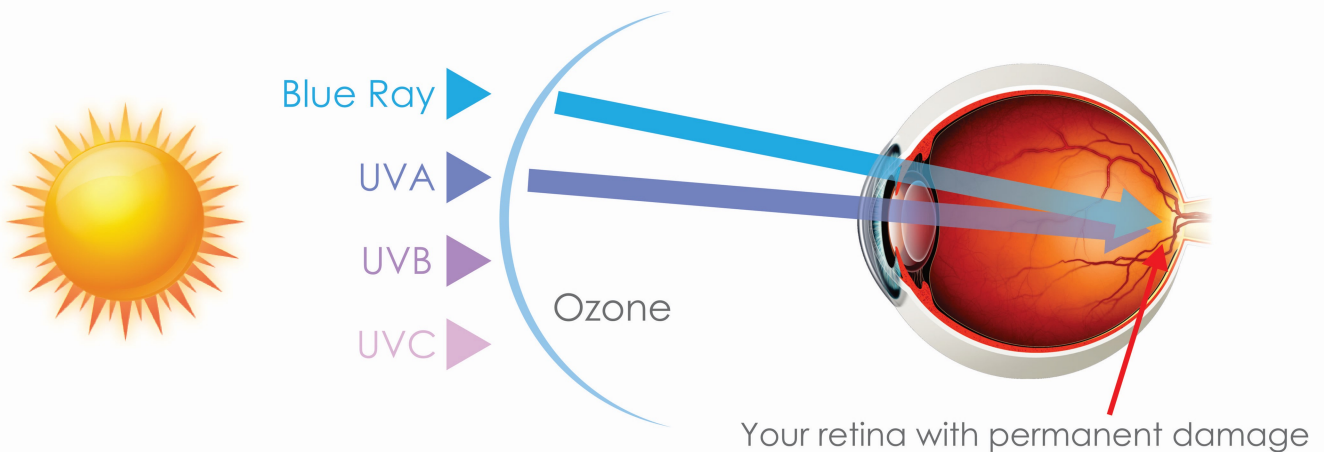

Excessive use of digital devices causes permanent eye **DAMAGE**. Even cataract was diagnosed in **18 YEARS** old teenager.

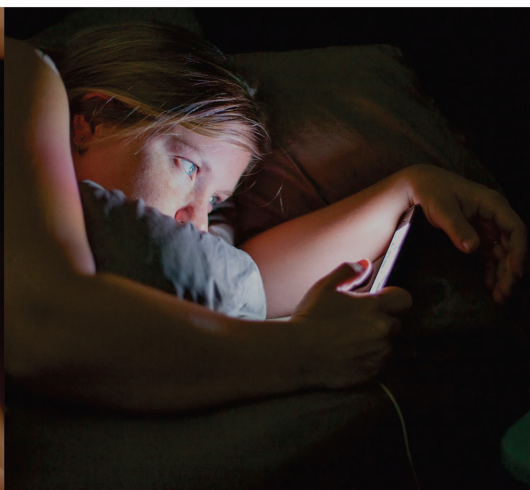

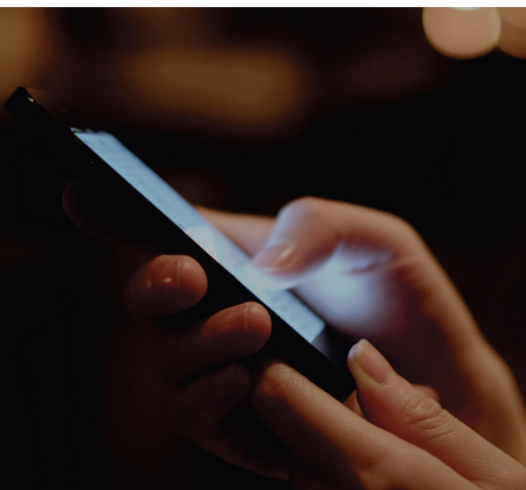

cellglò®

Don't Underestimate The Damaging Effects Of Harmful Rays!

High energy UV rays and blue rays from digital devices can directly enter your eyes and cause permanent damage even you don't feel pain.

Prolonged usage of digital devices and excessive sun exposure without protective eye wear have been proven to be the main causes of many eyes' diseases. They can cause irreversible optic nerve damage. If problems left untreated, it will lead to blindness.

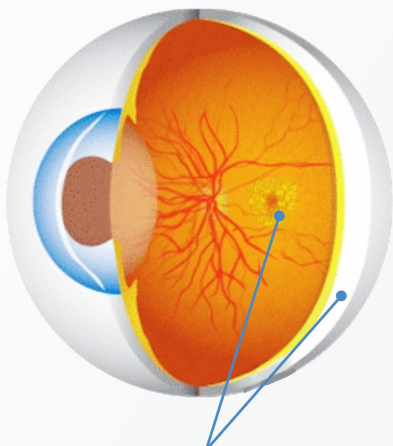

cellglò®

Eat Right To
Protect Your Sight!
Lutein-the crucial vitamin you
need for eyes' health.

Besides physical protection, intake of proper nutrients can also ensure the good health of your eyes. Lutein is one type of carotenoid which is most abundantly found in the macula of our eyes. It protects the eyes by blocking blue light from reaching the underlying structures (eg: optic nerve) in the retina.

It can't be produced in human body and must be obtained from food sources or supplements. The higher the concentration of lutein in your eyes, the lesser damaging effect from blue light you will get.

Lutein is found mostly
in the macula & retina

Formulated in France
Berat / Net Weight : 7g x 20 sachets

cellglò®

Get the right choice to
Protect Your Eyes Effectively!

According to research studies, we need about 10mg of lutein per day in order to prevent eye diseases effectively.
